

## REPORT OF METRO MEETING – 10/2/2021

### **Tunneling**

- Cross tunnels are being constructed where tunneling to South Yarra has been completed.
- Tunneling from Anzac Station to the city is expected to be completed by June 2021.
- The sludge treatment tanks and plant will then be removed from Edmund Herring Oval.
- Edmund Herring Oval will continue to be used for construction purposes until the entire project has been completed when it will be reinstated.

### **Anzac Station**

- Underground work is continuing.
- There is no further information about either the above ground design of the station or the large chiller boxes to be placed in St Kilda Rd. A report will be given at the next meeting.

### **Domain Road**

- Domain Rd will remain closed until the entire project has been completed.
- It is an obligation under the contract that the tram lines in Domain Rd and St Kilda Rd be reinstated.
- It will then be up to PTV what they do with the Domain Rd line.

### **Completion**

- The contractwork is running on time.
- No estimate was given of a completion date although a great deal of the ongoing work will be underground fitout etc.

Next meeting – 24/3/21
